Worksheet 1:

Name: Nijal Shankar

Group: L6CG4

Uni ID: 2329790

Installation and Mounting Google Drive

```
[2] from google.colab import drive
    drive.mount('/content/drive')
```

```
Drive already mounted at /content/drive; to attempt to forcibly remount, call drive.mount("/content/drive", force_remount=True).
```

```
[3] # !pip install pillow
    from PIL import Image
    import numpy as np
    import matplotlib.pyplot as plt
```

Exercise - 1:

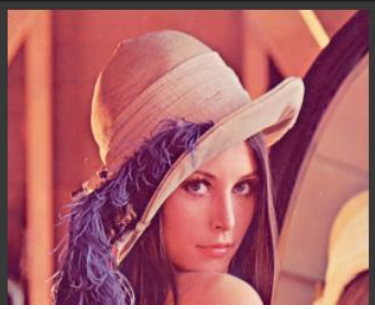
1. Read and Display Image

```
[4] colored_image = Image.open("/content/drive/MyDrive/Artificial Intelligence and Machine Learning/Week1Workshop1/lenna_image.png")
```

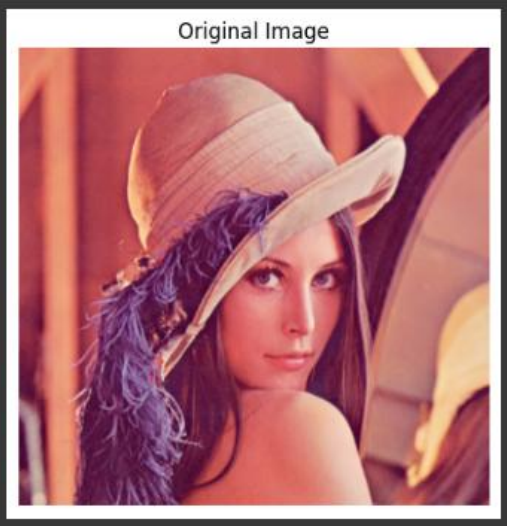
```
[5] print("Format: ", colored_image.format)
    print("Mode: ", colored_image.mode)
    print("Size: ", colored_image.size)
```

```
Format:  PNG
Mode:  RGBA
Size:  (366, 357)
```

```
[6] colored_image = colored_image.convert("RGB")
    display(colored_image)
```



```
[7] image_array = np.array(colored_image)
    plt.imshow(image_array)
    plt.axis("off")
    plt.title("Original Image")
    plt.show()
```

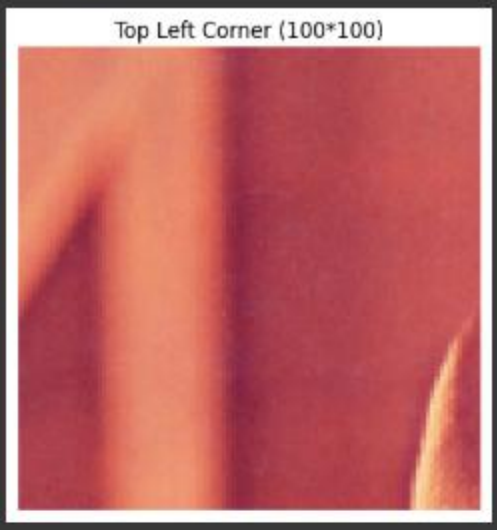


2. Display top corner of 100*100 pixels

```
[8] image_array = np.array(colored_image)

    top_left = image_array[:100, :100]

    plt.axis("off")
    plt.title("Top Left Corner (100*100)")
    plt.imshow(top_left)
    plt.show()
```



3. Displaying Color Channels

```
[9] red_channel = image_array.copy()
    red_channel[:, :, 1] = 0
    red_channel[:, :, 2] = 0
    plt.axis("off")
    plt.title("Red Channel")
    plt.imshow(red_channel)
    plt.show()
```

```
green_channel = image_array.copy()
green_channel[:, :, 0] = 0
green_channel[:, :, 2] = 0
plt.axis("off")
plt.title("Green Channel")
plt.imshow(green_channel)
plt.show()
```

```
blue_channel = image_array.copy()
blue_channel[:, :, 1] = 0
blue_channel[:, :, 0] = 0
plt.axis("off")
plt.title("Blue Channel")
plt.imshow(blue_channel)
plt.show()
```

4. Top 100 * 100 modification

4. Top 100 * 100 modification

```
[12] image_modified = image_array.copy()
     image_modified[:100, :100] = 210

     plt.axis("off")
     plt.title("Top 100 * 100 to 210 - Modified Image")
     plt.imshow(image_modified)
     plt.show()
```

Exercise - 2:

1. Load and Display Grayscale Image

```
[13] image_grayscale = Image.open("/content/drive/MyDrive/Artificial Intelligence and Machine Learning/Week1Workshop1/camera_man.jpg").convert("L")
```

```
[14] image_array = np.array(image_grayscale)

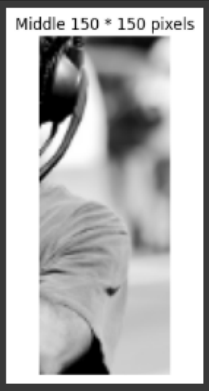
     plt.title("Original Grayscale Image")
     plt.axis("off")
     plt.imshow(image_array, cmap="gray")
     plt.show()
```

2. Extract Middle 150 pixels of Image

```
[15] width, height = image_array.shape

     col_start = (width // 2)
     row_start = (height // 2 )
     mid_section = image_array[row_start:row_start+150, col_start:col_start+150]

     plt.title("Middle 150 * 150 pixels")
     plt.axis("off")
     plt.imshow(mid_section, cmap="gray")
     plt.show()
```



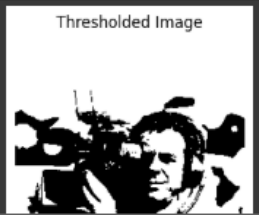
3.Apply a simple threshold to Image

```
[16] binary_image = np.zeros_like(image_array, dtype=np.uint8)

     height, width = image_array.shape

     for i in range(height):
         for j in range(width):
             if image_array[i, j] < 100:
                 binary_image[i, j] = 0
             else:
                 binary_image[i, j] = 255

     plt.title("Thresholded Image")
     plt.axis("off")
     plt.imshow(binary_image, cmap="gray")
     plt.show()
```



```
plt.show()
```

4. Rotate Image 90 deg

```
[17] rotate_image = image_grayscale.rotate(-90, expand = True)

     plt.title("Rotated Image Clockwise 90 deg")
     plt.axis("off")
     plt.imshow(rotate_image, cmap="gray")
     plt.show()
```

5. Convert Grayscale to RGB image

```
[18] image_colored = Image.merge("RGB", (image_grayscale, image_grayscale, image_grayscale))

     plt.title("Grayscale to RGB")
     plt.axis("off")
     plt.imshow(image_colored, cmap="gray")
     plt.show()
```

Grayscale to RGB

Exercise - 3:

1. Load and Prepare Data

```
image = Image.open("/content/drive/MyDrive/Artificial Intelligence and Machine Learning/Week1Workshop1/lenna_image.png").convert("L")
```

```
[20] image_array = np.array(image)
     print(image_array.shape)

     height, width = image_array.shape

     data = image_array.copy()

     plt.title("Original Image")
     plt.axis("off")
     plt.imshow(image_array, cmap='gray')
     plt.show()
```

```
(357, 366)
```

Original Image

```
[21] mean = np.mean(data, axis = 0)
     centered_data = data - mean
     centered_data
```

```
array([[ 61.34173669,  62.17647059,  62.83473389, ..., -82.04761905,
